Work Experience

Fresher

Project I

Student Management System using Php & MySQL

Description

This Windows application project store and manages all the students record and Detail for any organization.

In this project we provide search facility for getting a record of student. we can manages their fees, add fees and show the fess status wise reports. In this student management system all the things dynamically so we need to first add these threethings.

- Teacher Detail
- CourseDetail
- StudentDetail

After Adding this detail we can search report of students fess wise, name wise, teacher wise, course wise ...etc.

Project II

Clinic Management System using Codeigniter

Description

It is an application software which is based on the framework of php. It manages all the records related to patient, staff etc. There are following functionalities like print prescription during their registration, fetch all the records and also added remainder through this we send the sms or email to the patient for remember the review date.
