EXPERIENCE

Aug 2016 to Still Working	**Tata Consultancy Services**
Analyst	Analysis & Development

PROJECTS

Project Name : USAA-Auto/CAS

Role : Developer	Team Size : 8	Project Duration : 3 Year

Project Detail

This project is for USA based insurance company USAA, which follows agile methodologies.

Here for 3 years, I worked for developing and maintaining Auto channel and CAS billing channel using Java, Rest API, SQL, cpp, mainframe, html, css.

Now from last 6 moths, I am working in auto modernization development building the channel for public side quote.

My work includes following:

Aynalyze the business requirements and prepare the design for the work accordingly.

Use java technology to develop the back end for client server environment.

Develop customised web service mostly in rest api and interfaces using HTML and CSS.

Invoke that web service to CPP to interconnect it with host part and vice versa to store the data in DB2 and mainframe controlled from host.

Use debugging skills to improve the quality of code and improve delivery of project.

Project Name : USAA-Auto Modernisation

Role : Analyst	Team Size : 10	Project Duration : 1 Year

Project Detail

Here I worked in the roles of business analyst and tech lead, and my work consist of business analysis and technical analysis.

Here I develop business architecture using client requirements such as scope, processes and risk.

Analysed client business requirements and processes through analysis, documents, design,workshops and workflow analysis.

Engage client to gather software requirement, business rules.

Evaluated risks related to implementation, testing processes, and training.

Later created stories and did PI planning in agile process to start the work.

I also did technical analysis and make sure my team have all the data before starting the development work.
