**Technical Skills:**

- Operating system        :        Windows Family
- Programming Languages   :    Java,C
- Databases                :        SQL
- Office Automation        :        MS-Office

**Project Details:**

**Applying Data Mining Techniques In Cybercrime**

- The data mining techniques for identifying the Denial of Service attack. This type of attack is very dangerous as it jeopardizes the IT resources. It makes the server busy by imitation messages and repeated queries.
- The famous data mining technique called as pattern recognition on the log file. We set a threshold value.
- If the number of similar requests are received at the server, which is greater than the threshold value, we assume this as an attack and the administrator is been informed.
- we can identify the denial of service attack easily as in DOS attack, the attacker or the hacker sends same multiple requests in order to mitigate the server performance.

**Software Requirements:**

- Operating System     :  Windows95/98/2000/XP

- Application Server   :  Tomcat5.0/6.X

- Front End            :  HTML, Jsp

- Scripts              :  JavaScript.

- Server side Script   :  Java Server Pages.

**Advantages:**

- Improve Data Protection.

- Security will improve.

- Very Simple

- They work more efficiently

**Strengths:**
- Ability to learn new Technologies quickly
- Ability to work in teams
- Friendly, Competitive and Hard Working

**Hobbies:**
- Cricket playing, Shuttle.
- Online Games.

**Personal Snippets:**
- Name : Boreddy Srikanth
- Father's Name : Boreddy Srinivasulu Reddy
- Date of Birth : 23 Aug 1996
- Email id : reddybsrikanth78@gmail.com
- Languages Known : English, Telugu

**Declaration:**
I hereby declare that the above-mentioned information is correct up to my knowledge and I bear the responsibility for the correctness of the above -mentioned.
