Experience

Software Engineer at Mugiltechnologies, Coimbatore, TN, 01-10-2018

      Here I worked on wordpress theming and plugin development for many websites, and Magento theming for www.medilifeonline.in using bootstrap framework.

Software Engineer at Larsen & Toubro Infotech, Chennai, TN, 11/2016 – 6/2017

    I was in the team that was responsible for Magento 2.0, which is a piece of Ecommerce framework. I led the effort to build a feature that allows Ingram Micro resellers to sell their products online by creating Magento website. My responsibilities included designing the feature, module development.

Software Engineer at Payoda Technologies, Coimbatore, TN, 7/2016 – 11/2016

- Responsible for creating magento module, theme design and bug fix in Magento 2.0. The Ecommerce site is now live at www.dollargeneral.com.

Software Developer at Mugil Technologies, Coimbatore, TN, 8/2014 – 5/2016

- Responsible for creating module and theme design in Magento 1.9.
- Responsible for creating theme and plugin in wordpress.
- Responsible for creating application and design integration in Laravel 4.2.

Software Development Intern at Real Safety Systems, Erode, TN, 10/2012 – 3/2013

- I was responsible for designing UI for GPS Tracking system and implementing query based (date, time and customer) tracking.

Projects

Webshop, November 2016 -- **Magento**

At this technical product, we worked on automate the process of building an Ecommerce platform for the Ingram Micro resellers. This process includes a lot of functionalities which needs a Magento developer, AWS administrators, Catalog Management for their Ecommerce system. There are three separate team worked on this project. I was in the team Magento and we created the modules for automating the installation process of Magento in AWS, Ingram Product Import, Integration of Ingram Product Pricing, Ingram Shipping methods and payment gateway integration.

TaaS, November 2016 -- **Magento**

This project was intended to provide technology as a service. I worked individually in this project and created modules for Ingram user sign up. I managed the site with magento backend and made some UI changes based on the requirements.

Brandshop, July 2016 -- **Magento (www.dollargeneral.com)**

At this project, i was in the team and we worked on design integration and module development. I created module to display the banner and advertisement in the website and module for product slider.

Travel Moyo, August 2014 -- **Wordpress (www.travelmoyo.com)**

I developed this project in wordpress, i worked on plugin and theme development from scratch. I converted the given PSD to html and bootstrap then i integrated into wordpress. I made addon for Request Quote, Backend option for website configuration, wordpress custom post type for category and payment gateway integration. The customer can book a tour on this site.

LawoodsHotel, August 2014 -- **Laravel (www.lawoodshotel.com)**

I developed this project in Laravel, i worked on booking functionalities, admin modules and integrated the given design to Laravel. The customer can book the application from the site and the admin can manage the room booking, users, and website data from the backend of the website. Admin can see Graphical interface Dashboard which helps to look into user engagement and booking metrics.

Kingkart, August 2014 -- **Magento**

This project not live currently but I worked for theming and module development in Magento 1.9. I developed module for Pincode based product shipping and Quick View product.

Other websites, August 2014 -- **Laravel**

I worked on other design integration for websites in laravel that are [Flylink](#), [Pulse72](#), [MayurCloth](#), [Aimsiit](#)

Tb Jewellery, February 2018 -- **Magento (www.tbjewellery.com)**

I developed theme and one module to display custom pricing.
