TECHNICAL SKILLS & ACHIEVEMENTS

- **Tools & Technologies :** Core Java, SQL, C++, Dot Net, Data Structure.
- **Achievements:** **GOLD MEDAL** recipient for securing for the first position in the University for M.Sc, **SILVER MEDAL** recipient for securing the second position in the National Level Techno Contest.

ACADEMIC PROJECTS

1. Web Log Analytics

Description: This Project enables us to do web log analytics over terabytes and petabytes of data. In traditional file or RDBMS system, it is impossible to analyze data having size greater than few GB's due to constrained nature of these system.

Responsibility: The purpose of this project is to reduce the overhead on the existing system in order to draw some business level analytics out of big data. It takes a lot of time if we want to do analytics over big data having Gigabytes of Terabytes of size, therefore with the help of Hadoop Ecosystem, we can surely reduce the overhead and time for drawing analytics in order to help the business to grow.

Technology Used: **Front End Tool :** JSP (Java Server Page) **Back End Tool:** Servlet
