Project Description

CMMS - is a software that maintains a computer database of information about an organization's operations. This information is intended to help maintenance workers do their jobs more effectively and to help management make informed decisions. CMMS data may also be used to verify regulatory compliance. To properly control the maintenance of a facility, information is required to analyze what is occurring.

Front End – HTML 5 / CSS 3 / Bootstrap 4 / JQuery.

Back End - .NET

Tool / Framework – Visual Studio

Database – MySQL Server

Bank at Finger tips - Bank Management System is based on dot NET and is a major project. It is used to Keep the records of clients,employee etc in Bank. The bank management system is an application for maintaining a personal's account in a bank. The system provides the access to the customer to create an account, deposit/withdraw the cash from his account, also to view reports of all accounts present. The following presentation provides the specification for the system.

Front End – HTML 5 / CSS 3 / Bootstrap 4 / JQuery.

Back End - .NET

Tool / Framework – Visual Studio

Database – MySQL Server
