Project title : Inventory Management system.
• Front-End: WPF C#
• Back-End: Sql Server.
• Description:-The Inventory management System is used to maintain a stock of material.

<u>2nd semester:</u>
Project title: Content Management system
• Front-End:-ASP.NET
• Back-End:-Sql Server.
• Description: The main objective of this project is to make our task easier to maintain all content and its information. In this we easily upload and search the content.

<u>3rd semester:</u>
Project title: Online Recipe Website
• Front-End:-JOOMLA_3.1
• Back-End:-wamp server.
• Description: The main objective of this project is to develop a full-fledged system provides collection of recipes.

<u>4th semester:</u>
Project title: Online Non banking Financial Company
Front-End:- PHP
Back-End:-wamp server.
Description: In Recent time, many people are trust on banks for saving their money and they hope they get more money after specific time of period from banks which are government approved.
But, In recent banks decrease the interest and don't give more benefits. So here private company provide more benefits and also give plan wise more interest and in hierarchy panel.
