Handled the team in absence of Team Leader
Provide technical assistance to the Client through remote access
Discussed and made plans with Level 2 support which was in US
Managed a Team and acted like a bridge between Client and the development and support team
Got best performing employee award.

Adrasteia Technologies since 2013 :

Project Manager and Financer:

Project 1:

Creating the Physical Site of the firm and Finance the Firm

Time duration: 3 months

Registered the firm with Ministry of Customs and Exchange with ST2 which was later on converted to GST in year 2019

Procured Capital to build the firm

Built the physical infrastructure for the company in Rohini New Delhi

Deployed machines like router, laptops and servers and client desktops at the physical location.

The goal of the firm was to build websites to both Indian and global clients, provide windows server support to global clients and windows client machines

Hence, built a team of 15 employees to work thus, conducted interviews for Windows Server Support and Desktop support and Php developers

Initial Projects:

Initial projects included tie up with firms like IndiaMart to find clients both in India and abroad

This included Deployment of certain softwares in bulk for example installing 100 Windows 7

Operating systems in a school

Installation of Norton or McAfee antivirus in bulk in a start up office

Installing MsOffice in bulk in client's office machines or in a school or in a lab.

Managing a team of technicians and provide on site support to clients by sending technicians

Project 2:

Websites development

Had exposure to Waterfall Methodology for website development

Duration of project was 1 year in 2014

Built a team of 3 Php developers to build different websites based on requirements of clients

Assigned the budget for the projects

Planned the project with the team

Held meetings directly with clients and discussed the designs, technology used and the pricing of the end product

After completion of each websites 1 year of support was provided to the client which even include changing the design of sites, editing or adding or deleting a page. adding a payment gateway on the site.

Project3:

Server Support and Desktop support on client machines

Built a team of 5 Serversupport engineers to provide Remote support to Servers based on Windows Servers2003, Windows Server 2008, Windows Server2008R2 and Active Directory

The support was basic support and was a B2B process with a 3rd party company

Project 4:

Shanghai China On Site Project Management

Took a Team of 5 members to Shanghai China for an onsite project in year 2018 to join 150 client machines to domain after installing Windows 10 OS

Manage the team to provide support to the users who used those client machines and provide technical support to issues that come up with the team

Divided the team with each team member to work on 30 devices each and until each of device was handled to the end user after completion of work the project was not termed completed.

Uncertainty Management:

Within the Shanghai Project certain kinds of uncertainty was taken care off e.g., the Great Wall of Firewall in China could not let 150 laptops join to the domain as the Domain Controller was deployed in Europe

Hence, pressure from clients was handled with positivity as deadlines were approaching and the end user became idle resource to the client

Engaged with Network team and still there was a no go and it was deduced that certain ports were to be opened in Great Firewall of China for the project to be success

Thus, took the matter to Ministry of Information Technology Govt. Of China and got certain ports opened and thus the final work of the project were completed

Project 5: Singapore on site Project Management 2018

Later, that year took the same team to Singapore for similar project wherein an additional Windows Server was installed and Laptops, printers and other machines were joined to the domain

Troubleshooting on issues post joining the domain was conducted

Technical Support was managed and provided to the end user and their feedback were taken

Project 6: Video Calling Software 2019-2020 France

In July 2019 went to Paris France to meet a team that was creating a video calling software named Visio Clic

Understood and had exposure to Agile Scrum methodology for development of software

After meeting the team went to Sweden to meet the client to discuss about the product.

Had a deep understanding about the how the team will manufacture the software and understand the life cycle of the product

Visio Clic is a free video-call and geospotting solution, primarily geared towards doctors and medical practitioners

The software was great help in Europe especially during the pandemic as the patients could video call the doctor and for check ups and thus did not have to physically go to the hospital thus reducing the risk of virus attack.

The company wanted me to replicate the business strategy of the product in the Indian and Singapore market

Conducted demos of the software to medical practitioners and doctors in Delhi

Especially during the pandemic.

Hobbies:

Playing Chess (Delhi University Chess championship runner up)

Swimming

Playing Tennis

Travelling

Personal Details:

Name; Piyush Attri

Father's name: Shri H L Attri
