PROJECT DETAILS:

ProjecName: mineventilation and network analysis.

 Technology : Mining volume 2 technology

Responsibility**:** Team Leader.

Description:

Customized Interface for Database with using ansys softwareA ventilation network feature graph can directly and quantitatively represent the features of a ventilation network. To ensure the stability of airflow in a mine and improve ventilation system analysis, we propose a new algorithm to draw ventilation network feature graphs. The independent path method serves as the algorithm's main frame, and an improved adaptive genetic algorithm is embedded so that the graph may be drawn better.
