## Project Details

**Name: AN EFFICIENT ARCHITECTURE FOR 3-D DISCRETE WAVELET TRANSFORM**

**Status: Completed**

Duration: Sep 2013 - Oct 2013

Team Size: 4

Skills Used: Xilinx tool

The digital data can be transformed using Discrete Wavelet Transform (DWT). The images need to be transformed without losing of information. The Discrete Wavelet Transform (DWT) was based on time-scale representation, which provides efficient multi-resolution. The lifting based scheme filter provides lossless mode of information as per the JPEG 2000 Standard. The lifting based DWT are lower computational complexity and reduced memory requirements.
