OBJECTIVE

To achieve a top position in a related field and seek personal & Professional growth with a desire to excel by utilizing my abilities. In total **2- years** of total experience and worked more than **10+ apps** , developed and uploaded to the play store from start to end.

EXPERIENCE

Techsum Software Solutions, Pune — *Android Developer*

AUGUST 2018 - AUGUST 2020

Currently working at **Techsum Software Solutions,** *Pune.* Since AUGUST 2018 as an Android Developer.

PROJECTS

Good Bakery — *Online Bakery App (Team size–2 , 2–Month)*

Work on a bakery app which gives you the best bakery stores from your location and shows you an awesome variety of products to buy or gift.

Users can pay in advance, and **for payment used the Paytm gateway** here.

Role and Responsibilities:

So I worked on a design, different animations, connected apps to the backend through Retrofit. For notifications implemented Firebase cloud messaging in it.

I integrated Paytm payment gateway in it.

Xampus — *Student Teacher App(Team size –2 , 4–Month)*

Worked on a quite challenging app from beginning to rollout. Some of the features are chat feature, Social timeline with like and comment features in it, live event,Group chat,Articles to read,Dark mode,notes sharing and much more.

SKILLS

Payment Gateway and Wallet Integration(Paytm),
Fragments,Facebook-Google API, SOAP and REST services, Background services,Broadcast receiver, XML/JSON parsing, SQLite,Retrofit,Exoplayer Notifications,
Image loading libraries like Picasso and Glide.
Google Firebase its integration In app with its Authentication (mobile/email), storage and Realtime database
Crashalytic and analytics
Worked with different third party libraries like PrettyTime etc.
Google Map Api

PROGRAMMING LANGUAGE

Java

TECHNICAL/SOCIAL

Linked in:
https://www.linkedin.com/in/devanand-dharashive-7664b8126/

GitHub profile:
https://github.com/Devanand-debug

Role and Responsibilities:

I have learned to use different Api and demonstrated strong analytical and problem solving skills to complete my tasks and meet deadlines. And also I have participated in requirement gathering, client meetings, and interaction with design teams.

So this project is completely built using Firebase. Many Firebase features like Firebase Firestore database , realtime database as well as cloud messaging, storage for audio video image storing purpose. For displaying images used Glide library here.

Vid11 App — *Social App (Team size -2, 3-Month)*

Vid11 is a social sharing platform like a Sharechat app. Users can share photos, videos on this platform.

Role and Responsibilities:

I worked on the app from idea to rollout. From design of the application to the fully functional app. Worked on different technologies like web services, Firebase cloud store and Firestore ,FCM and libraries like PrettyTime.

Daily Articles — *Get daily articles(Team size-1 , 1-Month)*

Daily articles is an app which gives you awesome articles in technology, bollywood, news updates etc, everyone will receive notification once the new article is added.

Role and Responsibilities:

I am the only developer working on this project. This app is fully built on using Firebase features such as Firestore database, Storage as well as FCM(Cloud messaging).
