Projects

SPEECH TO TEXT & TEXT TO SPEECH CONVERSION - University of Engineering & Management, Kolkata **Feb, 2020 - Apr, 2020**

Voice Recognition System or Speech to Text conversion & vice versa is a system which can sense analog voice signals by using microphone of our computer & can interpret the audio signal, then it converts the audio signal into words. We can use those texts as input or command for any type of machine.

For doing that we are going to use html, JavaScript & Web APIs. We know we can build a web page by using html & after building process is over we can manipulate our front end by using JavaScript.
