OBJECTIVE:

To be involved in work where I can utilize skill and creatively involved with system that effectively contributes to the growth of organization.

PROJECTS:

Major Project:

<http://hudhanews.com/>
(android app) JAN 2018
- Present

This is news application which is built using PHP and it has been hosted and is in the market right now. this was developed by me individually with constant effort. Since it is still website and I'm building its android application soon it will be launched.

<https://hudhacom.000webhostapp.com/> This is the promotional website for this App.

UNDER - GRADUATION

Minor Project: E-Learning. JAN 2015 To MAY 2015

The Library Management Software is to handle the entire activity of a library. The software keeps track of all the information about the books in the library, their cost, their complete details and total number of books available in the Library. The user will find it easy in this automated system rather than using the manual writing system. The system contains a database where all the information will be stored safely. The system is user-friendly and error free.

POST - GRADUATION

project: Buddy bank. Oct 2016 To JAN-2017

Campus bank which involves student Id and from the barcode of student id all the transactions are done in campus. using this web app student can know the transaction details and transfer funds to other student account. built using laravel framework.

INTERNSHIP:

Project Title - Production and Sales Management for Large Scale Enterprise.

Company - Xsys Software Technologies.

Role - Developer and Software testing.

Duration - 6 Months From 1st Feb 2017 to 2nd July 2017.

Production Forecasting is intranet-based application that concentrates on the arteries of commercial transactions, which is properly established between the Sales team and the Production Team in conducting the general sales transactions. The application acts as a bridge between the Sales team and the production team to run the general business transactions of the sales in integration of the production and marketing team with the use of the Electronic media. This application helps the commercial people to gain through the accessibility of this business process with a formula of $24 * 7 * 365$ day standard.

The Actual purpose is designing the application as the present system is to improve the accessibility for the administrator, Sales manager and production manager in fulfilling their needs, as per the required transactional state.

EXPERIENCE:

 **Company - J P Securities.**

Designation - System Administrator.

Duration - 7 Months From 9th July 2017 To 24th Jan 2018.

Key contribution:

- Directed the implementation and performance tuning of Windows Server environment for client's global operations. Delivered a major improvement over old VPN system that catapulted productivity of remote sales force.
- Resolved a history of problematic network failure by troubleshooting LAN/WAN connections between multiple stores for a regional retail chain.
- Replaced major manufacturer's vulnerable network with robust security through joint architecture of firewall and DHCP.
- Stabilized, expanded and protected client network and PC environment. Built new file servers to maximize Web hosting, terminal server, file/print sharing and domain control performance.
- Ensured that all server hardware, operating systems, software and procedures aligned with organizational standards and strategic business plan.
- Increased team productivity and automated repetitive tasks by using batch files, Power Shell, VBScript and WMI.
- Trained employees across multiple departments on network operations including log-in procedures, network management software, permissions, printing issues, security and use of software.
- Acted as escalation point for troubleshooting advanced network/systems issues; consistently earned 100% issue-resolution scores by providing excellent service to internal and external customers.
