

SUMMARY

- 2+ years experienced Java Developer skilled in planning as well as testing across the complete development life cycle of a product to ensure smooth product development.
- Adept at identifying bugs and prescribing solutions to increase efficiency of a product.

KEY SKILLS

- Software Development
- Code Optimization
- Unit Testing
- Code Testing
- Quality Assurance
- Application Development
- End-user Support

TECHNICAL SKILLS

- **Java Ecosystems:** Micro- services architecture, J2EE, SQL, Spring boot, JPA, Hibernate, REST services
- **Languages:** Java, NodeJS, Python
- **Database:** Oracle, SQL, Teradata
- **Tools:** JIRA, Control M, IntelliJ

Awards

LIREL AWARD (09/2018)

Tata Consultancy Services
LIREL award describes the values of TCS. It stands for Leading the change, Integrity, Respect for Individual, Excellence and Learning & Sharing.

Upcoming POC

- Implement the solution with Spark Scala to store data in AWS data lake.
- Working on data collector web app using PostgreSQL & Flask.

SOFT SKILLS

- Group Etiquettes
- Quick Learner
- "Never Say Die" Attitude

PROFESSIONAL EXPERIENCE

Société Générale Global Solution

Software Engineer

Bengaluru, IN

Nov '19 - Present

A French multinational investment bank and financial services holding company.

Product and Application Development

- Worked with a team of 3 Developers to design, develop, test, deploy and maintain web applications
- Worked in a critical application GPS (**Group Permanent Supervision**) which is used for monitoring all the controls executed by users. It validates data & records and interacts with data lake & oracle database. After validation it provides data to BI for analysis.
- Play a vital role in maintaining critical tasks & daily treatments which helps in running the application smoothly.
- Current working on code migration from EJB to spring boot.
- Worked on OCP tool for the data migration to Oracle Database.
- Created Control M jobs for performing data transfer using specific commands.
- Enhanced productivity by **40%** by applying relevant technical skills to deliver **program changes** and unit test scripts.
- Executed planning, **documentation**, and tests to ensure code changes met maximum **requirements** and specifications.

Quality Assurance

- Supported **programming changes** during quality assurance and post-implementation leading to **customer satisfaction**.
- Researched and documented **software bugs** and created and **implemented fixes** to increase efficiency.

Tata Consultancy Services Ltd.

Associate Software Engineer

Bengaluru, IN

Jun '18 - Nov '19

An Indian multinational IT service and consulting company.

Application Development

- Involved in design and development of a new functionality of **EMS (Environmental Monitoring System)**. Involved in analysis, defect resolving and module development.
- Build REST API's using spring boot framework for controlling the IOT sensors.
- Involved in design and development of a new **API's** using **NodeJS** which helps chatbot (**ARIBA AI PILOT**) to fetch and as well as feed data to different data sources.
- Identified and **improved code inefficiencies** leading to increased **application stability**.
- Implemented POC for converting Angular modules to **ReactJS**.

EDUCATION

B. Tech in Computer Science

Rajasthan Technical University
