ACADEMIC PROJECT & EXTRA CRRICULAR ACVTIVIES

PROJECT NAME : Plant disease Detection using convolutional neural network

DESCRIPTION : Basically our project was about finding disease in plant using CNN, Human society needs to increase food production by an estimated 70% by 2050 to feed an expected population size that is predicted to be over 9 billion people. Using a public dataset of 55,020 images of diseased and healthy plant leaves collected under controlled conditions, we want to train a deep convolutional neural network model by applying ResNet-34 layer architecture to identify 14 crop species and presence or absence of 26 diseases.

EXTRA CURRICULAR & COCURRICULAR ACTIVITIES

- I had participated in "Project-poster-presentation" organized by ckpcet,surat .
- I served as a CR of computer department for 2 years.
- Participated in "cartooning" organized by CKPCET college on 11 sep,2018.
- I had participated in "Image-IT" event of "CONVERSE 2018"organized by S.C.E.T on 14th & 15th September 2018.
