## *OBJECTIVE*

Peruse an opportunity which will allow me to grow professionally, while effectively using my versatile skill set to fulfill the business requirement and to showcase the same data in the multiple formats which will help to understand and increase the output.

## *WORK EXPERIENCE*

**Working in Reliance Retail, Ghansoli Navi Mumbai, since Oct 2017 till date**

## *Responsibility*

➢ Handling the company's confidential data, store it at multiple systems and to reconcile the same so as to track and ensure that data is not misused or deleted anywhere for the purpose of hiding the frauds.

➢ As Reliance is India's topmost retail industry the business goal was to stand on the top position at any circumstances thus it is my core responsibility to show case the sales of stores with different attributes in the form of reports, dashboards and DataMart's.

➢ The business users come to me with their requirements, understand the same and check the feasibility & to deliver to business users as fast as possible.

➢ For displaying the data many a times tables needed to be source from the main system via ETL.

➢ To make the logic for fulfilling the requirements, logic to be built on ORACLE, SAP HANA with the use of queries and those queries are to be rooted via BO if the simple report is to be need which would not hamper the system performance, if data is huge then BW system was allow to use which could store the data in their own storage and can prepare the report which is user-friendly means user can see the report with using multiple attributes.

➢ Utilities preparation is also a big part as it was used for data loading without intervention of DBA person, in the EXCEL sheet data to be formatted in set format and just to upload the file with the utility likewise multiple utilities has been made on ER.

➢ EXCEL proficiency is must because, as a business analyst it is my first duty to represent the data in the excel or CSV or TXT format.

## PROJECTS

- **_POS UTILISATION_**: It helps to know the all cashiers are working properly or not, their efficiency is easily recognized by this technical attributes involved projects.
  I would also like to say if you enter in any reliance grocery shop, on store managers desktop you will find this dashboard.

- **_RROC_**: Reliance Retail operation center, which includes small parameters on which business regularity, efficiency of involved peoples and products utility can be understand.

- **_AUTOMATIONS_**: Since many years there were many reporting which involves Manual works were getting done by using excel which I tried to automate using ER Tools for e.g. Master's and Authorization object
