Educational Projects

2016	Under Graduation Project
	Title : Fuel Management System,
	Technology : ASP.net with C#,
	Back End : SQL Server 2005,
	Duration : 1 Month.
	Description : This is web-based software to monitor fuel consumption of an tourism company. We will be creating a customized report with the fuel consumption data. We can store the data like Vehicle Making, Registration Number, Vehicle Mileage, Fuel Tank Capacity, etc.. of the vehicles of the tourism company using all the above data the monthly report will be generated.

2018

Post Graduation Project

Title : Multi Keyword Encryption,

Technology : ASP.net with C#,

Back End : SQL Server 2008,

Duration : 3 Months.

Description : This is a web-based software to encrypt and decrypt the files using RSA Algorithm. We can upload a new file and it will get encrypted and stored in the cloud in the dedicated space given for the web site. A new keyword will be generated and will be sent to the user's mail id. Using that keyword we can download and decrypt the file to our local drive.
