Basics of C# - 1 year

Python - 1 year

SDLC/STLC - 4 years

Agile Methodology - 3 years

Automation Framework Design - 4 years

---

## WORK EXPERIENCE

### Test Analyst

09/2019 to Present

Infosys Limited

Pune, Maharashtra, India

#### Projects:

- DAIMLER AG-NPS (Sep, 2019 - Present)

#### Roles & Responsibilities:

- Identify and track defects with JIRA and supported developers in resolving problems by completing additional tests.
- Create accurate and efficient test scripts in UFT(12.52) to manage automated testing of SAP UI5 products and features.
- Gather data on integration issues and vulnerabilities and report all findings, including improvement recommendations.
- Debug code and locate root causes of problems by reviewing configuration files and logs using Automation Tool.
- Direct off-site teams completing Functional and Regression tests to support successful product development stages and releases.
- Plan and devise cohesive test plans for testing projects using HP-ALM.
- Augment knowledge of SAP based Applications, Test Management tools like JIRA and machine languages like Python, C# by actively participating in all available trainings and workshops.
- Communicate with developers and software engineers regarding noncompliance in existing code with updates to compilers and evolving standards of best practice in C# and Python.

### Test Engineer

05/2018 to 08/2019

Tech Mahindra Pvt. Ltd.

Pune, Maharashtra, India

#### Projects:

- AT&T Thunderbird-Ethernet & Merged (May, 2018 - Dec, 2018).
- SPRINT-iCARE (Dec, 2018 - Feb, 2019).
- SPRINT- SQAR Sales (Feb, 2019 - Aug 23, 2019).

#### Roles & Responsibilities:

- Designed and updated Automation test cases for transformation.
- Designed and Ran automation scripts using UFT. Manage Tests and Defect resolution using Test Management Tools HP-ALM and JIRA.
- Resolved range of problems by developing creative technical solutions and in co-ordination with various stakeholders involved.
- Handled and Participated in daily scrum meetings.
- Looked for ways to improve review processes and reviewed all test cases and scripts for quality.
- Automated all functional and regression testing approaches using UFT & VB Script.

- Compiled data on quality issues and vulnerabilities and reported all findings to Scrum team with suggestions for improvement.
- Resolved cross-platform interoperability issues promptly by using effective team management, technical knowledge and communication, resulting in better productivity and improved workflows. Worked on diverse projects using detailed test cases.

## **Programmer Analyst**

02/2016 to 05/2018

Cognizant Technology Solutions

Chennai, Tamil Nadu, India

### **Projects:**

- CUNA Mutual- LifePro Functional Testing (Mar, 2016 Jul,2016)
- CUNA Mutual-Turquoise and Trustage (Aug ,2016 April 2018)

### **Roles & Responsibilities:**

- Checked software programs for usability, functionality and design issues.
- Designed and updated Automated test cases using UFT and Coded UI tools to complete tests.
- Read and interpreted client requirements and design specifications to gain full understanding of each software program.
- Used TFS and HP-ALM database to maintain detailed records of known bugs to record descriptions and monitor progress on addressing and eliminating software limitations relative to production deadlines.
- Augmented knowledge of C# and Coded UI testing tools by actively participating in all available trainings and workshops.
- Designed simulation tests focusing on common user applications and unlikely cases, advising development team of current configuration performance limitations.
- Compiled data on quality issues and vulnerabilities and reported all findings to On-Site Team with suggestions for improvement.

---

## CERTIFICATIONS / LICENSES

### **Infosys Certified Agile Developer**

07/2020 to 08/2020
