Skills:

Technical

- Java Full Stack Development
- CCNA
- Hardware and networking
- Manual Testing

Strengths

Effective Performer
Work Life balance
Pleasant Personality

Non-Technical

Creativity
Humour
Consistent

PROJECTS

Java Projects: Designed Registration, Login, Feedback web pages for various requirements using Java, JDBC,, J2EE, JPA, Hibernate, HTML, Mysql.

Testing on Qcops: We have done testing on the Qcops application where we have first written the scenarios,converted them to test cases and applied them on the application and found the defects and generated the defect reports.

Smart Agriculture using IOT: In this project we have designed the smart way of farming using various sensors. Whenever the soil moisture level decreases, humidity level decreases, temperature level increases than the threshold values the motors turns on automatically by sending the sms alert and vice versa. We can also on/off the motor manually. If the animals enter into farm Ultrasonic sensor produces sound indicating the entry of the animals into the farm.

Vending machine using Verilog: In this we have designed vending machine that accepts the money from the customer, after selection of product it dispense the desired product with the remaining amount. The customer can cancel the process at any time by using push button.

Achievements and Workshops:

- Innovator award at WERP-India 2019
- Internship as a Co-Founder at WERP-India 2019
- Internship as a Joint Managing Director(Human Resource) for eight months at WERP-India 2019
- Written research papers on Smart agriculture using IOT and Vending machine using Verilog 2019
