PROJECTS

Pedestrian System using Face Detection (Jun 2018 - Feb 2019)
A pedestrian system was designed using computer vision that is automated on the facial detection of human. The process of detection begins once the presence of human is detected, saving resources of camera and time for both drivers and pedestrians.

Smart Parking System App (Dec 2017 - Feb 2018)
The Smart Parking Systems' App interacts with the system, in order to reach the free parking lot. It indicates the availability of parking slot in real time, which can be booked by the user as per the time required.

Trebax-Smart Chess Board (Dec 2018 – Present)
Trebax Smart Chess Board is a Research and Development(R&D) project. It is a physical smart board that brings back the players back to the traditional chess board. It connects two people at different places over the game on two separate boards.
