Work Experience

PRODUCTION ENGINEER

varitech engineers

August 2018 to Present

VARITECH ENGINEERS

- Provide technical expertise or support related to manufacturing.
- Determine root causes of failures using statistical methods and recommend changes in designs, tolerances, or processing methods.
- Incorporate new methods and processes to improve existing operations.
- Review product designs for manufacturability or completeness.
- Apply continuous improvement methods such as lean manufacturing to enhance manufacturing quality, reliability, or cost-effectiveness.
- Investigate or resolve operational problems, such as material use variances or bottlenecks.
- Evaluate manufactured products according to specifications and quality standards.
- Design testing methods and test finished products or process capabilities to establish standards or validate process requirements.
- Identify opportunities or implement changes to improve products or reduce costs using knowledge of fabrication processes, tooling and production equipment, assembly methods, quality control standards, or product design, materials and parts. and monitoring capabilities.

Education

B. TECH.

HMR INSTITUTE OF TECHNOLOGY

2017

Skills / IT Skills

- Assembly & Production
- Quality Inspection
- Production Optimization
- Maintenance
- Production Planning
- Material Management
- Quality Assurance
- Testing
