Projects:
- **Technology**- .Net
  Website - https://www.onebliss.com
  Duration: 60days

To create a fully functional website as an Individual Contributor (06/19-07/19)

  o **Description**: **onebliss.com is a website which caters to users who are interested in learning Yoga and Meditation online**. Also, through this website accreditation to the users is provided who have successfully completed a certain amount of time. This website has been designed using full stack technologies having backend as Asp.Net working as an Intern in Headway Data Systems, Hyderabad. I have

designed and developed complete website and database individually consisting of 7 different tabs and completed it in two months' time. Technologies used but not limited to the following: SQL Server, Visual Studio, HTML5, CSS3, JavaScript.

- **Technology**- HTML5, CSS3, PHP, SQL Server
Duration: 30days

Created a fully functional website for filling examination forms with a team of 3 members (04/19)

- **Description: Created a portal for students to autogenerate examination forms with their proper details and completely automated the end to end process for saving time and future efforts in filling further forms for different exams.**

  I designed the website using HTML5 and CSS3 for creating the UI of the website. We used cookies for saving sessions ad user details on login.
