10th CBSE, Bardsley English Medium Senior Secondary School

83.6%

EXPERIENCE

Associate System Engineer, IBM, Pune

Mar 2021 - Present

- Trained on technologies like Oracle SQL, PL SQL, Unix, Datastage, Datawarehouse and Informatica.
- Joined my project in June 2021. I am currently working as a Data Engineer.
- We mainly work on ODI which is an ELT tool.
- Supported various requirements of the client from deployments to minor enhancement.
- Worked on various data fixes and code change as well. I acquired understanding of the client system.
- Prepared written summaries to accompany results and maintain documentation.
- Employed data cleansing methods, significantly enhancing data quality.

Android Developer Intern, AW Technology Pvt. Ltd, Bhopal

Jun 2018 - Jul 2018

- I gained an understanding to build android application from scratch.
- We used technologies like Android Developer, XML, Firebase and Java.

Projects

Doctor's Appointment

- Technologies used-Android, XML, Google Firebase and java
- Overview- Some online systems that are already functional still have some drawbacks. To overcome these drawbacks an online patient appointment system is proposed using Android enabled mobile application.

EventsApp

- Technologies used-Android, XML, Google Firebase and java
- Led this Android app project which tells about all the real time events happening in your city.

LANGUAGES

English

Hindi

Expense Manager

- Technologies used- HTML, CSS, Javascript, ReactJS and NodeJS
- Overview- It is a component based website application to track your expenses. You can also sort your expenses using different parameters. You can view your expenses in the form of graphs.

Youtube Home Page

- Technologies used-HTML and CSS
- Overview-This is a simple single page application to understand the use of flex in CSS. I have replicated home page of Youtube.
