## Career Objective

Analytical & curious Data scientist looking forward to utilizing my skills & expertise in Python, R-language, data visualization & Machine learning would like to contribute towards the company's growth.

## Projects

### 1) Restaurant Rating Prediction [🔗](#)

Oct 2021 – Dec 2021

Problem Statement:

The main goal of this project is to perform extensive Exploratory Data Analysis(EDA) on the Zomato Dataset and build an appropriate Machine Learning Model that will help various Zomato Restaurants to predict their respective Ratings based on certain features.

**Results:** the solution is give on the above hyperlink on the problem statement

### 2) Movies Recommendation System [🔗](#)

Nov 2021 – Dec 2021

Problem Statement:

Build a movie recommender system out of an existing movie and user rating data.

The system should be able to take users' movie ratings as input and provide movie recommendations based on those ratings.

## Skills

### Python

Web scrapping, Data Cleaning, Data Mining, Visualization

### Machine Learning

Currently learning ML model and implementation

### SQL

Beginning of SQL query wizard, database structures, principles, theories and practices

### R-Language

Data Visualization and Statistical Analysis with R

### Statistics

Descriptive and inferential Statistics, Hypothesis Testing, Regression Analysis

### Tableau

Data Modelling & Transformation, Math & Statistical Analysis. Analytical & Visualization Skills Filtering, Sorting and Grouping.

## Certificates

### Python Developer

naresh it technologies  
OCT/2020

### Django web developer

Naresh it technologies  
Dec 2020

### Data Scientist [🔗](#)

Intellipath  
Nov2021

## Education

### Master's in Data Science, Intellipath [🔗](#)

Mar 2021 – Nov 2021

### Mechanical Engineering

Dr.Babasaheb Ambedkar college of engineering and research , Nagpur

May 2012 – Jun 2015
