CAREER OBJECTIVE

To excel in my field through hard work, research, skills and perseverance. Willing to work for a reputed organization to deliver my service up to the best of my capabilities.

EDUCATION

Course	Institution	Year of Passing	CGPA or Percentage
Indian Certificate of Secondary Education	Bishop Cotton Boys School, Bangalore	2012	70
Pre-University Course	Shri Bhagwan Mahaveer Jain College, Bangalore	2014	60
Bachelor Of Engineering in Information Technology	Sathyabama Institute of Science and Technology, Chennai	2018	7.23

ACADEMIC PROJECTS

- **Information System for Medical Aid.**
  This project presents a medical aid Information System. Firstly we can identify the specialist doctors within private or government hospitals in the nearby location. Secondly identifying the extent to which the services offered and gives the details about the hospitals and doctors.
- **Major Project is Securing Patient Health Records Sharing system in Cloud Computing.**
  The main objective of this project is that, to develop PHR model which allows a user (patient) to create, manage, and control health data at one central place through the technology of web, which has thus made secure storing, retrieval, and sharing of the information. In this system each patient is allowed to take the full control of medical records and can share health information with a variety of users, including medical report providers, family members and friends. But while it is easier to have PHR services for everyone, but there can be many security and privacy risks which could slow down its acceptance. To ensure users (patient) confidential control on their own PHRs, it is fundamental to have fine data access control model that works with non-trusted servers.

WORK EXPERIENCE

Company	Role	Project	Duration
Web Technologic	Software Engineer	Willis Towers Watson	May 2018 – August 2019

Description

I am a Java developer currently working on a web application which is hosted on a EMC based application. It works as a storage space for client documents. The application works on JRE 1.8 and is hosted on Tomcat server and it uses Angular JS. We use the agile development as our software methodology, and my day to day activities involve software development, debugging, maintaining the software, deployments onto different environments.

Responsibility
- Created a custom application on the pre-prod environments as an custom activity and received appreciation from team
- Made several bug fixes as a part of application development
- Handled a lot of User issues and made several deployments onto different environments
- Developed jobs to run at different environments and auto scheduled them to lessen the manual intervention
- Created queries to fetch complex reports which would save a lot of man-hours

Technical Skills
- *Database* : SQL Server
- *Skillset* : C, C++, HTML, Core Java, Servlets, JavaScript, JDBC, MySQL, AWS

PERSONAL INFORMATION

Date of Birth : 16th August 1995

Father's Name : L Raghunath Reddy

Mother's Name : L Subhashini

Languages Known : English, Telugu, Kannada, Tamil and Hindi

Nationality : Indian

DECLARTION

I hereby declare all the above furnished particulars are true to the best of my knowledge and belief.
