EDUCATION

B.Tech(Computer Science and Engineering)

Lovely Professional University Punjab India

2016 - 2020

6.2

High School

Sarvjanic Inter College, M. Badshahpur

2010 - 2012

72% hai

Higher Secondary

Sarvjanic Inter College, M. Badshahpur

2012 - 2014

68%

WORK EXPERIENCE

Banking Management System

In this project, we can access the data of bank, example withdrawal money and add money to customer account day by day,

08/2017 - 02/2018

My Tasks

- My Role was to create interactive web pages using HTML and CSS.

Data encryption and decryption

In this Linux script, I created a shell script tool from which I can protect data by applying password and decrypt by brute force pass matching.

02/2019 - Present

My task

- My task is to encrypt data and decrypt data through code (whole code done by me only)

Threads processing System: C Programming

Using this program one can see the process of threads in computer.

08/2016 - 11/2016

Achievements/Tasks

- My task to show working of threads

Message encode and decode by different techniques such as vinegar, play fair cypher, monoalphabetic cypher etc.

11/2019 - Present

Achievements/Tasks

- Test to decode all cypher in one place it is easy to handle and save more time also.

SKILLS

C

C++

Python

Basics of HTML

Basics of CSS

Analytical Skill

Shell Scripting

Java basic

PERSONAL PROJECTS

Create a blog of minor feild education
(05/2019 - 06/2019)

- go to <https://crazeofcyber.blogspot.com/?m=1>

Password generator (08/2018 - 10/2018)

- Create a python tool from which we can generate random password in three levels, high, medium and low strength and we can copy and paste that . and also can adjust the length of password using Tkinter.

ORGANIZATIONS

Forever Living Products (Multi-level marketing company) Healthcare product manufacturer (03/2019)

CERTIFICATES

Fundamental of Ethical Hacking by Jerking
(06/2018 - 07/2018)

Introduction to international business by Coursera
(03/2019 - 04/2019)

B2B marketing by Coursera (05/2019 - 06/2019)
