PROJECTS

Restaurant Reservation System   Stevens Institute of Technology, Hoboken

- Designed a website for restaurants to provide information about their restaurants to customers. The customers can look at menus, timings of restaurants, addresses and reserve a table as per their convenience.
- Used technologies like React, TypeScript, NodeJS, Express, NestJS, MongoDB for front end and backend.
- Integrated other technologies such as NestJS, RabbitMQ, GraphQL and Firebase Auth for improved performance.

Ecommerce Chatbot   MPSTME, NMIMS, Mumbai

- Designed an Ecommerce Chatbot on Facebook so that users could browse products in a much more natural way and buy it from the chat itself. For understanding natural language and context implementation used NLP modules.
- Integrated Bot Framework with different personalized Intents and Entities.

Online Student Help Portal   Thakur Polytechnic, Mumbai

- Developed a Web Portal for students that analyzed Diploma exam scores and identified suitable universities for students. Implemented dashboards for different use cases like Syllabus viewing, question papers, feedbacks, etc.
