PROJECT

TITLE: Design and Fabrication of Oil Skimming machine using solar cell skimmers

DESCRIPTION: Design and Fabrication of Oil Skimming machine using solar cell skimmers using belts, disks, or continuous mop chains of oleophilic materials to blot the oil from the water surface. The oil is then squeezed out or scraped off into a recovery tank. Skimming can prevent clogs in lines and sprays by removing tramp oil from coolant. Tramp oil removal maximizes the effect and life of the coolant and also increases the life of the tool.
