  The aim is to create web pages for websites which gives the user to add graphical interface, rich text format and many more.

Projects

SUMMER TRAINING ON DATA SCIENCE
Telcocrate Technologies | June 2019
The project I have done is Iris-Data.
Using the data of this project, I have learned to predict the values based on its previous data and some of the tools of Python to show the data as Visualisation.

DATA ANALYSIS ON GOOGLE PLAY STORE
Lovely Professional University | August 2019
Using the help of Tableau Prep, I have learnt how to remove all mistakes that are causing errors in my analysis and with the help of Microsoft Excel tools like VLOOKUP, HLOOKUP, PivotTable, etc. I have learnt the mechanism of these to perform the analysis.

HTML-HOSPITAL MANAGEMENT SYSTEM
Lovely Professional University | February 2018
It is of Online booking system.
I have learnt how to design a web page using the tools like html, css, java script and also as to design a web page we should every page seperately and attach all these with one home page. So, that it will be easy for us.
