Respected Sir/Madam,

With great pleasure, I wish to apply for the of at your esteemed organization. I am currently in the final year of Bachelor in Computer Science from Terna Engineering College.

I am a hardworking, honest individual. i am a good timekeeper, always willing to learn new skills. i am patient, helpful and polite.

I enjoy being challenged and engaging in projects that require me to work outside my comfort zone. Previously, I worked as a Supervisor at Decor Point, Thane, where I was responsible for managing the field work and clients. At Decor Point, I learned how to handle difficult situations in a face-to-face environment as well as develop excellent client-facing skills. I also understood how a business is operated since I am a good observer.

I have also worked at Eclerx, Airoli, which involved customer support and troubleshooting. Through this experience, my communication and time management skills cultivated by interacting with customers and solving their queries and problems. I have demonstrated the ability to work independently as well as with my team which helped me enhance my interpersonal skills.

I hope to find a role in your organization shortly where I can prove my expertise and be a valuable candidate for the company.

Thank you for your time and consideration. I look forward to a positive response.

With best regards,
    Jay Shimpi
