PROJECT SUMMARY

1.Title : IBM Referral

 Company : Reppify India Private Limited

Technology : Spring core, mysql, jpa, spring mvc, aws, multithreading(to process the candidate details),

collections, html, css, jquery, javascript

Description : Integrated Customized Reppify Talent Application with IBM Referral Tool for automation of the referral process, leveraging your professional connections to help your company fill jobs.

2. Title : Reppify Talent

Company : Reppify India Private Limited

Technology : Spring core, mysql, jpa, spring mvc, aws, multithreading(to process the candidate details),

collections, html, css, jquery, javascript
Description : Reppify Talent is a software solution that automates the referral process, leveraging your professional connections to help your company fill jobs. Each member opts into Reppify's secure network one time via LinkedIn. Company recruiters can search their connections through a granular set of criteria to find potential job candidates hidden in their networks. The system scans all of the connections for each opted-in employee at the company to determine if anyone in the network is a fit. Recruiters are immediately alerted about the best matches and from which employee(s) at the company they are connected to. They may, then, contact the employee requesting an introduction to their connection.

3. Title : Accenture RRE

Company : Reppify India Private Limiteds

Technology : Spring core, mysql, jpa, spring mvc, aws, multithreading(to process the candidate details),

collections, html, css, jquery, javascript
Description : Accenture RRE is a Referral Recommendation Engine is a social referral solution that aggregates the professional connections of company's employees to drive talent sourcing. Recruiters receive lists of best-fit candidates against each job requisition. Employees can introduce those jobs to the candidate with one-click.

4. Title: UserManagementAppTracker
Company: Paytm/One97 Communication Ltd.

Technology : Spring mvc, mysql, jdbc, spring mvc, javascript, html, css

Description: UserManagementAppTracker is a sub application of AppTracker which enhances the feature of add, delet, update and get reports of the user.

5. Title: ContestApi

Company: Paytm/One97 Communication Ltd.

Technology : Rest services, mysql, jdbc

Description : ContestApi is a middle layer API which consumes three api and converts the response in the form of xml and string format to the end user as per the request for each api.

6. Title: IdeaVodaPanel

Company: Paytm/One97 Communication Ltd.

Technology : Spring mvc, mysql, jdbc, spring mvc, javascript, html, css, multithreading (to process the bulk customer details), collections
