- Excellent time manager and planner
- Creative and organising skills
- Fast Typing

INTERNSHIPS

1 June – 30 June, 2019   Internship at **SMARTBRIDGE**, Hyderabad.

Worked on **Smart Waste Management System Using IBM Watson Services**. It Is Introduced to implementable in cities where waste production is domestically high but the effort put to control it is relatively very low. This idea is compatible mainly with the concept of

smart cities. The smart waste management mainly avoid the congested collection of waste generated domestically which creates difficulty to manage its disposal.

PROJECT OVERVIEW

- **IOT Based Air Pollution Monitoring System Using Aurdino**.
  It is all about to monitor and investigate the air quality over a web server using IOT and it will trigger an alarm when the air quality goes down beyond a limit.

- **Digital Thermometer Using 8051 Microcontroller**
  The Digital Thermometer Using 8051 Microcontroller is to show the current temperature value and temperature change on the LCD.

- **Body Glucose Level Prediction**
  The Overall goal of this project is to Predict the Body Glucose level in everyone's body with their respective ages using Machine learning Techniques.
