## PROJECTS

### Zodiac Sign Calculator (2018 - 2019)

This a c++ project which shows your zodiac sign based on your birth date . We need to check our mentioned date and month and thus find its equivalent zodiac that is which zodiac fits in that particular date as well as month and print its corresponding zodiac sign.

### Hotel Management System (2017 - 2018)

I have done this project through HTML, CSS and JAVA SCRIPT . This project explains that the hotel needs to maintain the record of guests and reserve rooms beforehand. For Customers to know the availability of the rooms on a particular date. And also explains about food and other services. The record of the food taken by each customer and the services availed by the customer will be kept. These records help in generating bill.

### Chicago City - Employee Data Analysis (2019)

The project was to load data from Chicago servers, to perform ETL process and then to create a dashboard with objectives specified . This project was done with the help of technologies Power BI,Excel,SSDT
