PERSONAL PROJECTS

Product Management System using Kanban
(02/2021 - 05/2021)

- To create a Pharmaceutical product management System.
- We created a user interface application by using java, SQLite and JDBC.

Hotel Management System (02/2018 - 04/2018)

- To create a management module of Hotel.
- We create a user interface by using C++ language that interact with users and provide options like Taking order , Billing , Checking out and other records by using basic to advanced programming techniques.

pizza hut manager system project documentation
(08/2019 - 10/2019)

- Fast-food Restaurant, so that all the transactions become fast and there should not be any error in transactions like calculation mistake.
- It replaces all the paper work. It keeps records of all the bills also, given to the customers, so that user could update his daily accounts.
- In order to run the project, you must have installed Dev C++ or Code Blocks on your PC. (we recommend these IDE). For the project demo, have a look at the video below.

Smart Railway Gate Control (08/2019 - 09/2019)

- Provide an automatic railway gate at a Levelcrossing replacing the gates operated
- The place where track and highway/road intersects each other at the same level is known as level crossing Reduction of time for closing and opening the gate.
- The arrival of train is detected by the sensor placed on either side of the gate at about 5 km from the level crossing.
- Once the arrival is sensed , the sensed signal is sent to the micro controller.

SKILLS

C

HTML

JAVA

DBMS

ARDUINO

Selenium
