Jquery

Major Project In Btech:

“Auto Silent Android application” Offers solution to those who wish to keep their mobile phones on silent mode for a specific geographical locations, time, Occasions. With this there is no need to go through the embarrassment of having your phone ringing at wrong position.

Major Project In Mtech:

I have Worked On the Project named “Nuget Package Analyzer”

This project Collects the Packages and its Existing Versions of Services in the Tfvc or Git Repositories. Compare this model with the latest versions of the Packages in the JFrog Artifactory or Third Packages from the local file.

If any of the Packages is found out-of-date it is collected into a model. If the User gives Analyze Only parameter input as true then we will collect and print the list of packages which are out-of-date.

If the User gives Analyze Only parameter input as false then scheduled User Story is created and updated based on the appropriate backlog

Others:

Father is a daily wage earner and Mother is a school teacher.
