Project: infortpay
Role: Testing and Configuration Engineer
Client Name : infort technology

Description of the Project:

The main feature worked in Master Setup, Client Company Management And Employee Management Master ,Salary Structure,Lead Management. etc. Tested all of these modules in this application and prepared test cases while testing these modules. The Forecast feature allows you to configure models based on the historic data and build patterns, to forecast the data for a period of time.The forecast results would now be displayed on a dashboard called Forecast Dashboard. This dashboard would be available from the Forecast configuration screen for each of the forecast configurations.

My Responsibilities:

- Prepared Test Plan, Test Cases and testing scenarios.
- Loading data into the application.
- Data preparation using PL/SQL
- Executing test cases and preparing daily execution report.
- Defect logging and tracking.
- On time escalations.
- Reviewing of test cases prepared by peers.
- Providing adequate support to the developers for defect analysis.
- Prepared Traceability Matrix between test cases and requirements.
- Sending project daily status reports.
- Performed Functional, Integration, Regression, Negative and System Testing.
- Providing collective status report of the team to management.
- Release Management.
- Documentation support.
