Personal Mission

To interact with all system entities to develop new ventures by generating, creating, collaborating, understanding, asserting, optimizing, and aligning for improving quality environment of the system by setting achievable goals in real life periods.

Technical Work Table

Name	Company Work Details/Abilities	Project	Skills	Role	Duration
Nucleus	A leading Finance Software company	OASIS BASIS	Foxpro , C, Oracle	Software Engineer	Mar, 1994-July, 95
IIS	SME enterprise integration.	BOPS, Infotransfer, Infoquery, Software Application Tools and Utilities Development	C,C++, Win 32, Oracle, Unix, Windows	Sr. Software Engineer	Aug, 1995-May, 99
Motorola	A Telecommunication Company	Equipment Testing Platform, Status Management Application	C,C++, MFC, MS ACCESS	Team Leader	August, 1999- July 2000
HPS	A HCL Company	IContact, Finttec Innovation for Banks, SIS, Securities Event Management, Meril Finance, Project Management Application Testing/Maintenance, Code Detailed Analysis Insurance Applications, Code Reverse Engineering Blogs, Software Engineering Apps etc	C,C++, Oracle, Java, Unix, Windows, Foxpro, SEI CMMI L5, PCMM 4 Human Resoursce, Telecommunication Protocols	Team Leader	July, 2000-April, 2003
IT Angel	SME Fintec Operations	Real Time Finance Apps	C,C++, Distributed Operating Systems	Sr Consultant	August, 2003-2004
PJSL	Software Development Department in Retail/Property/Open System Etc	E-commerce, CRM Apps, Analysis, Document Management	Blogging, RFP preparation, In House Product Analysis with Seniors, Project Management Activities, Day to Day Operations etc	Project Manager	July, 2006-, Dec, 2007
NetSutra	Software Development Center	Web Apps Development	Intra Day Operations	Project Manager	Jan, 2008-Dec, 2008
Sshram	Software Development	Mobile, Web Apps	Software Development	IT Consultant	June 2009 – June 2015
Fintec	An Enterprise Application	Fintec Apps	JSF/Oracle	Software Engineer	May 2013 – July-2015
Go IT	Information Technology/Software Development	Freelancer	Web technologies	Apps Engineer	Jan2016 – Present

Anuj Jain   umalme@gmail.com   9899287166   Delhi, India

Present Work Done

- OrangeHRM Module development
- MS Access Inventory app
- Debugging and coding in C++/C# for forex trading rules pattern
- Testing and Developed many web application in various domain especially ecommerce and finance for NY based client and Forex application and analysis using FIX protocol API in C# SDK. Testing and delivery.
- Worked AI and data refine using Python
- Working on Fintec apps
- Proof of concept development for many undergoing project
- Dialogflow Chatbot
- Marketing and Delivery of Software applications and web systems
- Dynamic application and website development in Java Technologies and .NET
- Product Add-On modules development
- Hands on involved in Php and module like Magento, Woocommerce, osCommerce and database oriented systems
- Hands on involved in Java and database oriented systems
- Develop Reprice web application for Amazon MWS API and eBay API
- A web application eBay analysis tool using CodeIgniter/Bootstrap 4.0/MySql
- A Garage service application development for UK based company
- Proof of concept development
- Marketing and Delivery of Software applications and web systems
- Versioning and release management of mCommerce application
- Dynamic application and website development in Java Technologies and .NET
- Product Add-On modules development
- Hands on involved in Php and module like Magento, Woocommerce, osCommerce and database oriented systems
- Hands on involved in Java and database oriented systems
- Find nearby store Implement Two APIs to display location of nearby stores on Map.

Jan, 2008-Dec, 2008
Web App 1
Involved in analysis, testing and daily delivery of work to production server after testing on staging server and release management of application and resolving build conflict. Personal contributions involved project management activities including discussion of solution with team members, distribution of task/work list, monitoring and keeping track, report onsite PM.

Web Apps 2
Involved in analysis, and testing of application. Personal contributions involved project management activities like requirement analysis, discussion of solution with team members, distribution of task/work list, monitoring and keeping track, communication with client.

Aug, 2006-Dec, 2007
Involved in analysis, testing and release management of application as developer wrote web services. Personal contributions involved project management activities like requirement analysis, discussion of solution with team members, distribution of task/work list, monitoring and keeping track and updating onsite project manager and communication with client.

August, 2003-2004
Involved in development, and testing and build/release, Designed, developed and maintain main Liffe Agent component for new system and existing system components. Personal contributions involved requirement analysis, discussion of solution with team members, distribution of task/work list, monitoring and keeping track, communication with client and onsite manager.

July, 2000-2003
App1
Involved in maintenance and development, debugging and testing, release and build management of the software systems using object-oriented methodology, communication with client. The initial job was setting up of environment to test the application. A simulated switch installed on Server and the application runs in distributed environment. I also wrote stubbed drivers to test most of the calls made to using application.

App2
Involved in development, system analysis, Designed and developed main calculation engine and database engine for new system. The main contribution was as OOAD s/w design and development of the extension. Enhancement of an application for adding insurer medical details. For testing of the application, a quotation exercise performed by some professional testing application available in the market to select the best product.

App3
Involved in maintenance, system analysis, and testing of the current working system. Played an important role in initial starting of project, involve in Knowledge Transfer phase and migrating applications to Windows environments. Personal contributions involved in team leader activities like distribution of task/work list to team members, monitoring and keeping track, communication with onsite manager to discuss progress. Application Study involves study of their programs, extracting useful information about the programs, making a data model about an application. Run and test current application in local environment.

App4
Maintain the driver component, develop test cases for the requirement verification, and test these cases remotely using Shell Scripts. Develop a mechanism to store output data in .csv files for enabling easy comparison as worksheet application.

App5
Involved in development of reports using automated tools and maintenance of report generation tool and systems reports analysis, design, development, testing and delivery. First, the report requirement is studied; data fields identification, and after mapping a query retrieve from the database. Are derived as an extension of the tool which are fed the about field formatting are inserted. Then new report program build using the existing tool libraries. After successfully compilation of program, it run to verify data with the expected results.

App6
Involved in impact analysis, solution design, and technical support and testing of front-end application. Work involves identifying date impacts in programs and writing solutions and doing unit testing of the programs on testing data.

App7
Securities Analysis and Implementation of Financial App.

App8
An application testing for project management application

App9

1995-2000
App1
An app generation tools code analysis and documentation. Enhance, build management.

App2
A legacy system migration for code and RDBMS

App3
Developed a migration tools work bench

App4
Data migration utilities development

Day to day operation
Purchasing the technical equipment
Involves in Recruiting cycles for knowledge personal
Maintain soft infrastructure

1994-1995
Apps development as trainee and engineer for Fintec systems database modules

Education
- Part time Courses in personal and professional acumen development
- PG in CS in 1994. Secured Excellent Grade
- BSc from Meerut University, India in 1991. Secured Honors Grade.

Achievements and Awards
- Accolades in excellence in Migration Application.
- Presented Seminar And Training

Professional Training and Continuing Education
- Attended Delta QMS training on SEI CMMI level 5 and PCMM 4.
- One week training on object oriented and visual integrated development environment.
- Training on telecommunication basics and on various design of data network protocol and development.
- Trainings in Java Programming, Basic Investment, Retail banking, Win Runner etc.
- Other Trainings are S/W Testing Life Cycle, HPS QMS PM/PL and QMS CMMI delta.

Seminars Attended
- Seminar on MF-COBOL technologies
- Intel set of tools for application profiling, debugging, performance measure
- Sci-Tech forum on Nano-technology, Environmental research and molecular biology
- On Oracle database design by Oracle Product Manager.
- On Y2K Migration, project solutions for different systems.
- On UML and OOAD.

Technology Skills
Hands on abilities wise contribution

Industry Executive Experience
- Display personality traits like to deal with ambiguity, a positive attitude, hands on and autonomous approach to work and high integrity, energy levels with upward spirals.
- A demonstrated record of accomplishment of consistent performance with an innovative and non-conventional approach.
- Development methodology experience in all phases of software development life cycle.
- To Team building, Bringing up hidden talent in members, involved, as hands on to better understand processes, Technical direction, dead line meetings etc.
- Inculcate positive competition by interest, work, strength, principles and quality.
- Have the leadership and people skills to develop the core technology team inculcating high quality service standards and customer focus.
- Moral boosting for positive environment, fostering quality thinking and self-reliance, bringing natural effectiveness, closing gaps between different layers for open communication.
- A person with an exposure to handling development teams on multiple platforms / technologies and developing software products for mission critical applications within tight cost and time parameters.
- Good knowledge of technology trends of IT implementation industry.
