PROJECT PROFILE

- Project Title:** “Sharerify- Social Media Influencers platform”
- **Language of Implementation:** CodeIgniter, MySQL.
- **Description:** Sharerify is a social media marketing network, your favorite social media influencer most likely works with us. Advertisers pay Sharerify.com to reach influencers like you. We operate a revenue share model where you as the influencer get a particular share/percentage from what the advertiser pays us. The first step is to create a free account, click on Apply button, campaigns are displayed, some campaigns are instant approval while some require advertiser approval. As soon as you gain access, read the instructions and make sure you follow it as instructed. Failure to do would likely be the reason for payment denial.
- Project Title:** “Hireberg – Recruitment Software”.
- **Language of Implementation:** CodeIgniter, MySQL.
- **Description:** Hireberg was designed to simplify your hiring process and save you valuable time by helping you choose the right candidates, manage your talent pool and strengthen team collaboration. Make recruitment and talent management your competitive advantages with the best Applicant Tracking System (ATS) on the market. It Includes Explore Recruitment, Easy Solution, Link Receive Applications, Enrich Profiles, Customize Career Page and Placement Management

Engineering Project :

- **Project Title:** “Customer Relationship Management Application for Online Buying & Selling Properties”.
- **Language of Implementation:** HTML, CSS, Bootstrap, JavaScript, PHP, MySQL.
- **Description:** Developed the website for the construction sites which maintains all information about the properties including information like images, area, location, contact, RERA verification which helps for the society to buy a flat. This website is online where users can access its information and manage all the adding, updating, deleting and some of its task. The system is very useful for the builders that can post and edit their properties and personal information and admin can monitor records of all of them.

Diploma Project :

- **Project Title:** “Website for Shree Santkrupa Shikshan Sanstha “
- **Language of Implementation:** HTML, CSS, PHP, MySQL.
- **Description:** Developed the website for the college management system is web based system allows admin to access and manage whole information about sanstha, library, hostel and staff. It provides facility to the student of college regarding information of college courses, library, facilities, staff etc. Administrator manages the information about news and events.
