PROJECTS UNDERTAKEN

- **Anytime medicine Vending machine** (Jan 2019-May2019)
 - o **Description:** Developed ATM vending machine Which provides a 24/7 medicines to the patients which can be placed on National Highways, Private maals and villages etc
 - o **Technical Aspects:** Introducing E-card between doctor and patient instead of prescription. Where all the information which is stored in E- card. E- card in noting but RFID card When patient swipe on the vending machine, inside RFID chip is recognized and allows the patient to dispense the medicines.
- **Complete android smart phone hacking by sending SMS** (Feb 2018 - April 2018)
 - o **Description:** Download the any official and trusted original apk from anywhere. Create your android meterpreter reverse TCP payload and bind this payload into original apk save this apk , create the URL link from online for the backdoor or binded payload apk which is also official and trusted apk then share the link to the victim mobile and access the information through NG rok server.
 - o **Technical Aspects:** For this venture user uses the kali linux for protection. Before creating the backdoor apk ,first user create the ngrok tunnel from local host to the ngrok server. next step is to bind the payload to the original apk with help of msfvenom command and assigning the listening port and local host to the binded apk. As soon as when victim install the binded apk using msfconsole setup the server to listen and to access the information of victim smartphone.
