<b>Academic Project</b>	
1. <b>Project undertaken at the B.Sc level:Topic-</b> EXPLORING AND ANALYSING INTERNATIONAL MIGRATION FROM INDIA. The main objective of the paper is to study the growth trends of the relevant macro-variables and to examine the progress of the Indian economy and to relate it with the migration in India. I also looked into the internal migration of India and also the international migration of Indian neighbouring countries , under the supervision of Dr.Sanchita Sen , Professor of Gokhale Memorial Girls' College, University of Calcutta. The study reveals that in spite of the GDP growth people will migrate from one country to another due to economic,social and political effects. So India needs to improve its economic growth by not only improving physical or social infrastructure but also improving the education system and job opportunities of the country.	

2. **Project undertaken at the M.Sc level: Topic-** INEQUALITY AND CRIME IN INDIA: Analysis Of Domestic Violence With Survey Data. This study investigates the relationship between economic inequality and domestic violence in the context of the Indian economy over the last few years, under the supervision of Dr. Panchanan Das, Professor of Economics, Department Of Economics, University Of Calcutta. The study has found that there is emperical and logical evidence supporting the hypothesis that economic inequality increases domestic violence against women.

#### **ACHIEVEMENTS**

- I have appeared for Prarambhik Part 1, Chitra Bhushan Part 1 and Chitra Bhushan Part 2 by Pracheen Kala Chandigarh in Fine Arts (painting) and received 1st division.
